gas surcharge will soon  
increase by 327%.

# CALIFORNIA'S UNIQUE GAS COSTS MORE TO FORMULATE.

## WHY IS...

### CALIFORNIA'S UNIQUE GAS MORE EXPENSIVE?

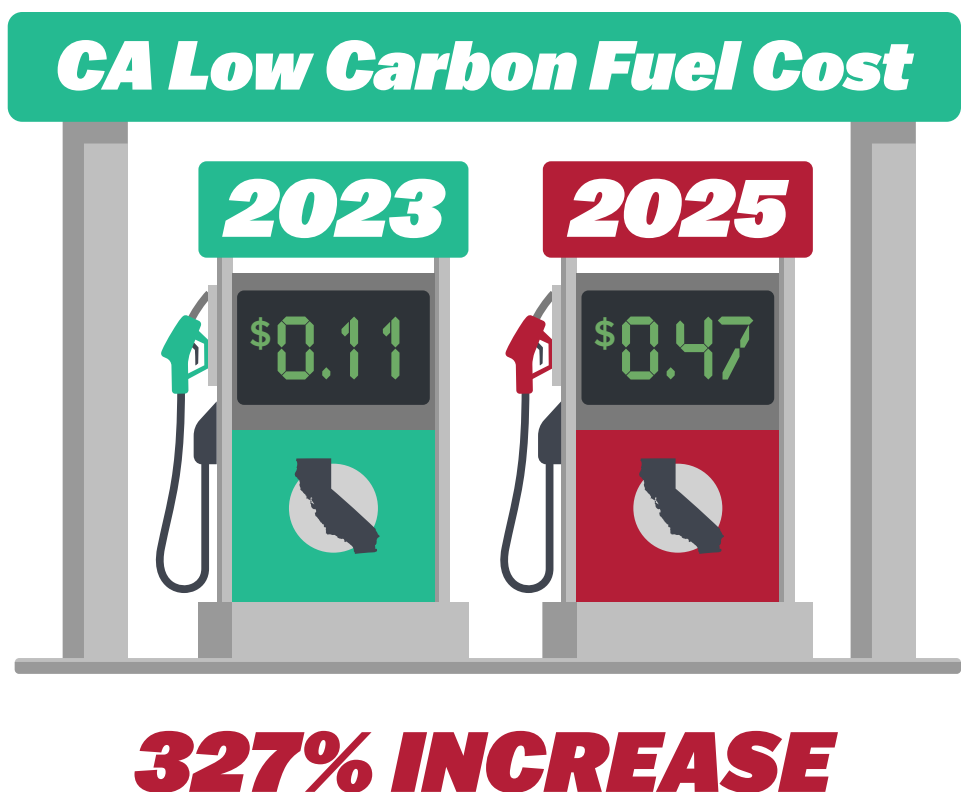

The Legislature and Governors have given authority to regulators to mandate requirements on gas designed to lower its carbon intensity.

This means California gas is unlike any other state's gas. The process to meet these mandates makes California gas more expensive to produce. This is one of the reasons California gas prices are higher than other states and often the highest in the U.S.

According to the regulators themselves, the added cost to make this special gas will increase 36 cents per gallon by 2025.

## WHAT DOES IT COST YOU?

- According to the California Air Resources Board (CARB), our unique gas adds 11 cents to every gallon sold in California.
- By 2025, the CARB expects that cost will increase to 47 cents per gallon.
